CV UPDATED SEPTEMBER 2026

MAJA NIEKRASZ

Examining the rules, risks, and systems behind *sustainable change*.

With a background in European and environmental law, I explore how governance frameworks influence the transition toward sustainable forms of energy, finance, and economic development. My work focuses on renewable energy, risk governance, sustainable business models, and emerging approaches to environmental protection.

EDUCATION

European Law School, Master of Laws (LLM)

Maastricht University — 2023 – 2026

- Specialization Sustainable Europe · Cumulative GPA 8.1 / 10
- Coursework European Environmental Law, Global Environmental Law, Corporate Responsibility Law, Advanced European Union Law, Global Tax Policy and Sustainable Governance

European Law School, Bachelor of Laws (LLB)

Maastricht University — 2019 – 2023

- Minor Law & Technology · Cumulative GPA 7.6 / 10
- Thesis Greening the ICC – conceivable campaign or quixotic quest?
- Coursework Comparative Law, European Company Law, European Union Law, Law & Data Science, Legal Technology

ACHIEVEMENTS & PROJECTS

"Regulating Tax Incentives: The Greening Example" Project

Global Tax Policy and Sustainable Governance, Maastricht University — 2025

- Examined fiscal policy frameworks designed to internalize environmental and public health externalities, applying True Price methodology to carbon taxation models using the examples of EU ETS and CBAM.
- Delivered a formal presentation and moderated a peer seminar debating the regulatory and economic feasibility of EU carbon pricing mechanisms.

"Governing Towards a Climate-Neutral European Union" Project

European Environmental Law, Maastricht University — 2025

- Examined the legal and regulatory frameworks of the EU's 2050 climate neutrality targets, analyzing the structural link between the European Climate Law and the Governance of the Energy Union Regulation.
- Presented the regulatory roadmap and moderated a peer seminar on "soft governance" versus strict enforcement penalties for Member State non-compliance.

Quantitative Legal & Regulatory Data Analysis

Course Project, Maastricht University — 2023

- Processed and structured empirical datasets of CJEU and ECtHR judgments using Python (pandas, NumPy) to extract cross-jurisdictional compliance and enforcement metrics.
- Designed data visualizations (matplotlib, seaborn) of longitudinal compliance patterns and implementation trends across Member States and States Parties.

Finalist, ELSA National Moot Court Competition (Competition Law)

European Law Students' Association — 2021

- Advanced to the national finals following multiple qualifying rounds.
- Formulated written legal briefs and delivered oral pleadings before panels of legal experts and practitioners.
- Collaborated in a team with 3 peers to analyze complex competition law cases under timed procedural constraints.

EXPERIENCE

Teaching Assistant / Tutorial Manager (Global Environmental Law)

Maastricht University — NOVEMBER 2023 – APRIL 2024

- Coordinated the delivery and academic logistics of the tutorial course.
- Reviewed and streamlined digital course documents on learning platforms, guaranteeing uninterrupted student access to academic resources.
- Served as the primary operational point of contact between students and course faculty, managing administrative communication and seminar flow.
